

Found42 AI Readiness Report

Tunde, here is where you stand

Your role: Founder or executive

96% - Stage 3 of 3: Ready to scale

49 of 51 points

Foundations: 0-40%. Ready to build: 41-80%. Ready to scale: 81-100%.

You build, test and share AI skills, and someone owns them. The next step is automations that run across the team and give hours back every week.

Your five areas

How you use AI today: 100% · Strong (9 of 9 points)

AI is part of how you work and it saves you real time. Put some of that time into building workflows others can use.

Reusable skills and workflows: 100% · Strong (12 of 12 points)

You build and reuse skills. Combine related skills into a plugin so your team can install them in one step.

Context and data: 100% · Strong (9 of 9 points)

AI has the context it needs. Use your templates as test examples so new skills are checked against your best work.

Testing and safeguards: 100% · Strong (12 of 12 points)

You test and you have clear rules. Write your checks down so others reuse them when they build.

Team and scale: 78% · Developing (7 of 9 points)

Someone is building, mostly on the side. Give them one shared place to publish skills so the team stops rebuilding the same thing.

Your quickest wins

Does anyone on your team have time set aside to build AI workflows?

You answered: Someone does it on the side. Nobody owns AI workflows, so they aren't maintained.

Give one person a few hours a week to build and look after AI workflows.

Your recommended next step

Custom automations for your team

If your team already builds and shares AI skills, the next hours come back from automations that run without anyone starting them.

- Discovery with your AI champion and end users
- Automations built on the skills you already have
- Testing and failure-mode training before rollout

Inquire about automations: <https://www.found42.com/contact>

Workflows built for your role

If off-the-shelf AI tools don't fit how you work, we sit down with you and your team, co-design Claude skills for your role, and test them before you rely on them.

- Discovery with the people who actually do the work
- Claude skills and plugins designed around your role and tools
- Testing and failure-mode training before rollout

Inquire about workflows: <https://www.found42.com/contact>

AI Builder Advanced

Apps and multi-agent systems for your builders. Join the waitlist.

The Advanced waitlist is not available here. Ask Found42 about advanced training; an inquiry does not enroll you.

Scoring method

How this is scored: each of the 17 scored questions is worth up to 3 points, 51 in total. Your overall score is your points as a share of 51, rounded to the nearest whole percent. Area scores use the same method within each area. Your stage comes from the rounded overall score.

A starting point for a conversation, not an audit or certification. This PDF was generated locally; nothing was sent to Found42.

All your answers

1. Which AI assistant do you use most at work?

Claude

Context only - not scored

2. Does your company give you an approved AI tool for work?

Yes

3 / 3 points

3. How do you mostly use AI at work?

To do whole tasks, like research or meeting prep

3 / 3 points

4. Does AI save you real time each week?

Yes, a lot

3 / 3 points

5. For tasks you repeat, do you reuse saved AI instructions (like a saved prompt or Claude skill)?

Yes, usually

3 / 3 points

6. Do you use AI for the regular parts of your job, like research, reports, meeting prep or follow-ups?

Yes, every week

3 / 3 points

7. Have you built or set up your own AI skill or workflow?

Yes, and I use it regularly

3 / 3 points

8. Do any of your AI tasks run automatically on a schedule?

Yes

3 / 3 points

9. Is your AI tool connected to apps you use, like email, calendar or shared drives?

Yes, several

3 / 3 points

10. Are your work meetings recorded and transcribed?

Most of them

3 / 3 points

11. Do you have templates or good examples you reuse, like a standard deck or brief?

Yes, easy to find

3 / 3 points

12. Do you check AI answers against the source before you use them?

Always, for anything important

3 / 3 points

13. Do you test a new AI skill or workflow before you rely on it?

Yes, always

3 / 3 points

14. Do you know the common ways AI gets things wrong, like making up facts?

Yes

3 / 3 points

15. Does your company have written rules on what customer or company data can go into AI?

Yes

3 / 3 points

16. Do you know which tasks you would hand to AI first?

Yes, clearly

3 / 3 points

17. Does anyone on your team have time set aside to build AI workflows?

Someone does it on the side

1 / 3 points

18. When someone builds a useful AI skill, can the rest of your team use it?

Yes, from one shared place

3 / 3 points
